World's first 3D shopping mall

Zagreb, October 5 2009

3D online shopping mall is the world's unique and revolutionary product introduced by the new Croatian company named Trillanium.

It is an unseen project which will provide a completely new way of shopping and online socializing none has ever experienced before. Apart from shopping, what makes Trillanium unique is an emphatic social element, such as chat, data exchange etc. There is also a business possibility of meetings and educations.

Trillanium has started developing this project in January 2009. Its commercial opening is planned for November 2 2009 in Zagreb. The next step will be the 3D mall opening throughout the country after which Trillanium will open its doors all around the world.

The pure indemnity of the project is 1.000.000 EUR invested by the "business angel" Mr. Hrvoje Prpić.

The simplicity of shopping in Trillanium 3D mall is provided by a special software which enables the installation from your web browser without needlessly application downloading.

The first Trillanium 3D shopping mall will be opened in Zagreb on the size of 180.000 virtual m2. Over 90 Croatian and international well known companies with more than 25 different services will offer their own products to the consumers in Trillanium. Thereby, Zagreb's Trillanium will be remembered as the world's first 3D shopping mall ever. This will place Croatia among the countries with the high technology reputation.

So from now on you will be able to buy everything you need (groceries, textile, technical goods etc.) while sitting on your couch. Everything you buy will be delivered to you any time suitable for you. Every single product in each shop will be reviewable while rotating around its axis. All products are 3D shaped and sold by real salesmen available in each shop, communicating and advising customers.

"The project has started by making an usual web shop for a friend which soon turned into one of my biggest adventure within a few months. Due to creativity of the [Bruketa&Žinić's](#) staff, my contemporary technology knowledge as well as both excellent application production and team of experts and 3D designers coordinated by Tomica Radošević, this project is the historic product which tags Croatia with the world's virtual no.1 label.

When you say "Trillanium", the world will know it is Croatia you're talking about.

Trillenum:

Technology and life are the two things successfully associated. Complying with social needs as well as overlooking the internet supply and demand is what our business basis is made of. In order to make it all happen, we use today's best brand new technology whilst minding what tomorrow brings. Total Trillenum offer takes place in 3D online mall where the customers meet real salesmen and other people. There you can find the widest supply of products along with the best service for everyone's needs.
